ABOUT ME

Final-year Software Engineering undergraduate at the University of Kelaniya with practical industry experience gained through a six-month software engineering internship. Experienced in working across the software development life-cycle, including requirements analysis, system design, implementation, integration, testing, and collaborative delivery. A responsible and adaptable team player with strong problem-solving ability, attention to detail, and a professional approach to developing reliable software solutions.

EDUCATION

B.Sc. (Hons.) Software Engineering

University of Kelaniya

📅 Jul 2023 – Present

📍 Sri Lanka

- Current GPA: 3.65/4.00
- Domains: Advanced Web Applications, Mobile Computing Applications, Data Science & Engineering Applications

GCE Advanced Level — Physical Science Stream

President College

📅 2012 – 2020

📍 Matara, Sri Lanka

- Z-Score: 1.59 Combined Mathematics: B Physics: A Chemistry: B

INTERNSHIP EXPERIENCE

Software Engineering Intern

Atlato (Pty) Ltd | Angular, Node.js, Express.js, MySQL

📅 Aug 2025 – Feb 2026

📍 6 months

- Contributed across the SDLC through requirement gathering, SRS documentation, ERD-based database design, UI development, frontend-backend integration, and testing.
- Worked on *TuneUp*, *Matrix*, and *Crew*, developing dashboards and workflow modules for inspections, service tasks, part transactions, alerts, and crew leave template management.
- Performed component and system testing to improve workflow reliability and support release readiness.

PROJECTS

Web Development

Forever Hotel — Integrated Hotel Management System

Ongoing

Group Project | Next.js, Node.js, NestJS, PostgreSQL, Redis, Docker, React Native

Contributing to a microservices-based hotel management platform with six subsystems: Hotel Website, Manager Dashboard, Front Desk System, Guest App (PWA), Kitchen Management System, and Worker Management System. Supports online booking and Stripe payments, real-time analytics, FIFO kitchen order queuing, and worker task self-assignment. 📄 GitHub Organization

Bake House — E-Commerce Platform

Nov 2025

Individual Project | Angular, Node.js, Express.js, JWT, MongoDB, Auth0, Google Login, Tailwind CSS

Built a secure full-stack e-commerce platform with product catalog management, Google/Auth0 authentication, JWT session handling, and a scalable client-server architecture. 📄 Repository

Budget Buddy — Income/Expense Tracker

2025

Individual Project | MERN, Tailwind CSS

Built a personal finance tracker with authentication, a dashboard, income/expense management, filtering, and Excel export. 📄 Repository

Research

Ongoing

Integrating Structural and Textual Semantics for Knowledge Graph Representation Learning

Group Research Project | PyTorch, PyTorch Geometric, RoBERTa, RGAT, ComplEx, Knowledge Graphs

Developing a KG-LM-KG representation learning framework for knowledge graph completion that integrates structural graph information with textual semantics. The proposed Dynamic Reverse-JAKET architecture uses a two-stage Relational Graph Attention Network (RGAT), a frozen RoBERTa-based semantic bridge with gated fusion, and ComplEx scoring. Implementing leakage-aware training, negative sampling, filtered link-prediction evaluation, and experimental comparison against a controlled KG-only baseline using benchmarks such as FB15k-237 and CoDEX-M.

Mobile App Development

2025

MyTasko — To-Do Mobile App

Individual Project | React Native CLI, AsyncStorage

Built a task-management app with create, edit, delete, status filtering, and local persistence using AsyncStorage.  Repository

2025

HabbitDone — Habit Tracker

Individual Project | React Native CLI, AsyncStorage

Built a habit-tracking app with CRUD operations, filtering, progress tracking, and a lightweight local authentication flow.  Repository

TECHNICAL SKILLS

Programming: HTML, CSS, JavaScript, TypeScript, Java, PHP, SQL

Frameworks/Libraries: React, Next.js, Angular, React Native, Node.js, NestJS, Express.js, Tailwind CSS, Ant Design

Databases: PostgreSQL, MySQL, MongoDB

Backend & Integration: RESTful APIs, WebSocket, Socket.IO, RabbitMQ, JWT, RBAC, Stripe API, SendGrid API

DevOps & Testing: Docker, Docker Compose, GitHub Actions, CI/CD, Jest, Postman, Apidog

Tools & Platforms: Git/GitHub, Bitbucket, Jira, Figma, VS Code, WebStorm, Android Studio, Linux

Architecture & Concepts: Microservices Architecture, Event-Driven Architecture, Progressive Web Apps (PWA), API Gateway, Responsive Web Design

HIGHLIGHTS

 Top 10 Team — JuniorHack 2024
Software Engineering Students' Association, University of Kelaniya

 Top 5 Team — Inter-Faculty Mathematics Competition 2024
University of Kelaniya

VOLUNTEERING

Membership Lead

IEEE WIE Student Branch Affinity Group, University of Kelaniya

 Sep 2024 – Present

Public Relations Lead

Ignite Sri Lanka 1.0, Rotaract Club of University of Kelaniya

 Oct 2024 – Mar 2025
